JULIANA AMPARO CABRERA

Las Piñas, Metro Manila, Philippines | jaacabrera@gmail.com | 09178157727 | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Senior QA level professional with 15+ years of enterprise manual testing expertise in airline, insurance, and SaaS platforms. Specialized in risk-based testing, defect analytics, root cause analysis (RCA), and quality governance, with a proven track record identifying critical defects and driving production stability through UAT, SIT, and regression planning. ISTQB Certified Tester with hands-on leadership managing distributed QA teams and full defect lifecycles. Actively expanding into test automation and AI-assisted testing (Playwright, TypeScript, Cucumber, Claude-assisted test case generation) as the next stage of a long-term QA automation career path.

CORE SKILLS & TECHNICAL EXPERTISE

Testing Expertise: Functional, regression, smoke, sanity, SIT, UAT, web, exploratory, usability, cross-browser testing
QA Leadership & Governance: Test strategy & planning, risk-based testing, defect analytics, Root Cause Analysis (RCA), release validation, UAT governance, defect lifecycle management, Agile collaboration
Mobile QA: Manual testing (iOS/Android), device/OS compatibility validation
Test Management Tools: Azure DevOps, JIRA, Zephyr Scale, TestMo, TestRail
Technical Knowledge: Oracle SQL, Unix, HTML, CSS, Java; .NET-based application testing; XML and web services (SOAP/REST) validation; Figma
Domain Experience: Airline reservation systems, insurance platforms, healthcare copay systems, IT ticketing, SaaS applications, HRIS platforms
Test Automation: Playwright (TypeScript); Selenium WebDriver (Java), Cucumber, JUnit
GenAI in QA: ISTQB CT-GenAI certified; hands-on application of Claude for AI-assisted test case generation and prompt engineering, with human-in-the-loop review in live QA engagements

PROFESSIONAL EXPERIENCE

Software QA Tester (Contract) | Innovative Systems Group Global | *Jul 2026 to Present*
Domain: HRIS (Human Resource Information System)

- Serving as sole QA tester for an HRIS platform, independently authoring the test plan and owning full test coverage from requirements through execution.
- Logged 245 defects to date, driving structured intake-to-resolution triage in collaboration with developers, product stakeholders, HR, and the Philippines Delivery Manager.
- Combined manual and automation testing using Cucumber, TypeScript, and Playwright, drafting test scenarios covering ~60% of documented user stories, with 100+ test cases designed to date.
- Leveraged Claude (AI) to accelerate manual test case drafting, applying hands-on human review and validation before execution to ensure accuracy.
- Acted as de facto Business Analyst, reviewing and refining requirements for clarity and usability in collaboration with the development, HR and delivery management team.

Senior QA Tester | Deel Philippines EOR Services Inc. | *Jul 2025 to Mar 2026*
Domain: SaaS / HR Technology (Startly Platform)

- Developed and executed a comprehensive test strategy for Startly platform across ~18 sprints (2-week cadence), identifying risk areas and aligning testing priorities with business criticality.
- Designed and executed 900+ manual test cases prioritized by risk, focusing coverage on high-impact workflows and reducing low-value test overhead.
- Collaborated with a 12-person cross-functional team (6 developers, 4 QA, 1 Product Owner, 1 Business Analyst) to deliver production-ready releases across web and mobile.
- Authored behavior-driven (Gherkin) test scenarios to clarify requirements and expand test coverage across user journeys.
- Performed end-to-end functional and regression testing across web and mobile platforms, ensuring production stability prior to each release.
- Performed design QA and visual testing in Figma, validating UI implementation against design specifications to catch discrepancies before release.

Quality Engineering Lead | Myridius (formerly RCG Global Services) | *Jul 2023 to Jun 2025*
Domain: Insurance & Enterprise Applications

- Owned QA strategy for a configurable, multi-tenant P&C insurance distribution platform serving multiple carriers, wholesaler, Managing General Agency (MGA), and retail agency clients across multiple lines of business (personal & commercial auto, commercial property/building, and other P&C lines).
- Applied risk-based testing across the policy lifecycle — submission, quoting, binding, issuance, billing, and commissioning; focusing coverage on the highest-impact workflows of the platform.
- Supervised distributed QA team of 4 testers (2 Philippines, 2 India), ensuring consistent application of testing methodologies and quality standards across geographies.

- Reduced recurring production defects across the platform by establishing a structured RCA process and feeding findings back into regression coverage.
- Built complete regression test suite of 100–300 test cases from scratch in 3 months as sole QA on a client engagement, enabling reliable release validation where none had previously existed.
- Managed full defect lifecycle and release readiness through Azure DevOps, collaborating with Product Owners to prioritize issues and meet release readiness standards.
- Served as panel evaluator in QA technical interviews, assessing testing knowledge and domain fit to support hiring decisions.
- Recognized as Corporate Employee of the Quarter (Oct 2023), selected from a global workforce of 1,300+ employees across the US, Philippines, and India, for measurable quality impact and leadership contributions.

Tester Senior Analyst | Myridius (formerly RCG Global Services) | *Aug 2022 to Jun 2023*

Domain: Hospitality / Hotel Loyalty (Hilton)

- Validated complex loyalty points accrual and redemption workflows for Hilton's hotel booking points platform, utilizing Oracle SQL to verify points calculations and booking data integrity.
- Executed functional and regression testing across hotel booking and loyalty modules, ensuring accurate points calculations across booking scenarios.
- Built hands-on automated testing experience through internal Selenium, Cucumber, and JUnit training and application, gaining working knowledge of automation framework design and script maintenance.

Software QA Tester | Innovative Systems Group Global | *Jan 2022 to Jul 2022*

Domain: IT Service Ticketing

- Operated as sole QA tester for the IT ticketing project, independently owning full test coverage from requirements review through production validation.
- Executed Unix scripts to validate automated ticket creation across Znuny (helpdesk) and Zabbix (monitoring) systems, ensuring end-to-end integration reliability.
- Managed test cases and defect tracking in TestRail and JIRA, maintaining structured traceability across both application domains.
- Practiced Selenium WebDriver (Java) test automation fundamentals through internal training exercises on the OrangeHRM demo application, building foundational hands-on scripting experience.

User Acceptance Testing Analyst | Innovative Systems Group Global | *Apr 2020 to Dec 2021*

Domain: Healthcare Copay Systems

- Served as sub-lead for the healthcare copay system project across ~21 months and 40+ sprints (2 sprints/month, monthly releases), performing functional testing while coordinating QA activities across a team of 14 testers to ensure comprehensive coverage.
- Provided guidance and mentorship to junior UAT analysts, strengthening team capability and ensuring consistent quality delivery.
- Awarded UAT Standout Performer (Dec 2021) for providing guidance and mentorship to junior UAT analysts, ensuring quality delivery and strengthening team capability.

Functional Test Lead | Indra Philippines Inc. | *Feb 2017 to Sep 2019*

Domain: Airline / Aviation — Payment & Booking Systems

- Owned end-to-end payment testing for a major Southeast Asian airline's booking system across ~30 monthly releases, covering processing fees, card route restrictions, and multi-currency transactions — a mission-critical revenue function.
- Led a 3-person QA team; conducted performance reviews and monthly 1-on-1s to support individual growth.
- Facilitated monthly "Airline 101" brown bag sessions to build team domain knowledge, and created QA process documentation as a standardized team reference.
- Awarded YES Award (Jan 2018) for technical excellence and quality leadership.

Tester Senior Analyst | Navitaire Inc. (An Amadeus Company) | *Feb 2011 to Feb 2017*

Domain: Airline / Aviation — Booking & Revenue Management (.NET Platform)

- Executed manual regression, smoke, and functional testing for a .NET-based airline booking application, including API-level booking validation; later assumed configuration and validation responsibilities on the Fare and Schedule team (fare setup, schedules, ancillary fees, airline-specific parameters).
- Achieved Top 10 Bug Logger (2012) and QAE Award (2013) through excellence in defect identification and quality analysis.

EDUCATION

Master of Business Analytics (in progress, expected Dec 2027) - Mapúa University, Manila
Bachelor of Science in Computer Science - Mapúa University, Manila
