JULIANA AMPARO CABRERA

Las Piñas, Philippines | +63 917 815 7727 | jaacabrera@gmail.com | https://www.linkedin.com/in/jaacabrera | https://jaacabrera01.github.io/myportfolio

PROFESSIONAL SUMMARY

Quality Assurance (QA) leader with 15+ years across Human Resources (HR) Tech Software as a Service (SaaS), insurance, airline, and healthcare platforms. Has led QA teams of 3–4 testers, coordinated User Acceptance Testing (UAT) for 14 testers, and owned test strategy, defect triage, Root Cause Analysis (RCA), and release readiness for enterprise products. Certified by the International Software Testing Qualifications Board (ISTQB) in Foundation Level (CTFL) and Testing with Generative AI (CT-GenAI), with hands-on Playwright automation and AI-assisted testing that let a lean QA function cover more without losing control of quality.

CORE SKILLS

- **QA Leadership:** Test strategy & planning, risk-based testing, test management, defect triage, Root Cause Analysis, release readiness, UAT governance, team leadership & mentoring, stakeholder management, Agile/Scrum
- **Testing:** Functional, regression, smoke, System Integration Testing (SIT), UAT, end-to-end, exploratory, cross-browser, mobile, Application Programming Interface (API), visual/design QA (Figma), data validation using Structured Query Language (SQL)
- **Tools:** Jira, Azure DevOps, TestRail, Zephyr Scale, TestMo, Postman (Representational State Transfer (REST) and Simple Object Access Protocol (SOAP) APIs), Oracle SQL, Unix/Shell
- **Automation:** Playwright, TypeScript, Cucumber Behavior-Driven Development (BDD), Gherkin, Page Object Model, Selenium WebDriver (Java), JUnit, Git/GitHub, GitHub Actions (CI/CD)
- **AI-Assisted QA:** ISTQB CT-GenAI; Claude Code, GitHub Copilot; agentic test generation, prompt engineering, Large Language Model (LLM) output review, human-in-the-loop governance, self-healing locators
- **Domains:** Human Resource Information System (HRIS) / HR Tech SaaS, Property and Casualty (P&C) insurance, airline booking & payments, healthcare, hospitality loyalty, Information Technology Service Management (ITSM)

PROFESSIONAL EXPERIENCE

Quality Engineering Lead (Sole QA, Agentic AI) | Innovative Systems Group Global

Mar 2026 – Present · Enterprise HRIS

- Sole QA engineer for an enterprise HRIS platform spanning 20+ modules; authored the test plan and own end-to-end coverage from requirements analysis through release sign-off.
- Logged 326+ defects since March 2026 and run intake-to-resolution defect triage with developers, product owners, HR stakeholders, and the Delivery Manager.
- Act as de facto Business Analyst: review and refine user stories and acceptance criteria with development, HR, and delivery management before sprint commitment.
- Built a hybrid manual + automated regression suite of 300+ Cucumber/Gherkin scenarios covering ~76% of documented user stories, executed with Playwright and TypeScript using the Page Object Model.
- Designed and operate an 11-agent Artificial Intelligence (AI) test automation pipeline (Playwright + Claude Code) covering Document Object Model (DOM) scraping, scenario planning, BDD generation, failure triage, and self-healing locator repair.
- Enforced human-in-the-loop review gates at every agent handoff: no AI-generated scenario runs without human approval, keeping every test decision traceable and auditable.

Senior QA Tester | Deel Philippines EOR Services Inc.

Jul 2025 – Mar 2026 · HR Tech SaaS (Startly) · Role ended due to company restructuring

- Owned the test strategy for the Startly HR platform across ~18 two-week sprints, aligning test priorities with business-critical workflows.
- Standardized QA processes for a 12-person cross-functional Scrum team (6 developers, 4 QA, Product Owner, Business Analyst) and maintained the team's central regression suite.
- Designed and executed 900+ risk-prioritized test cases across web and mobile, validating production stability before every sprint release.
- Authored Gherkin/BDD scenarios in TestMo with clear acceptance criteria, structured for conversion to automation.
- Performed design QA and visual testing against Figma specifications, catching User Interface (UI) discrepancies before release.

Quality Engineering Lead | Myridius (formerly RCG Global Services)

Jul 2023 – Jun 2025 · P&C Insurance & Enterprise Applications

- Led a distributed team of 4 testers across the Philippines and India, standardizing test methodology and delivery quality across time zones.
- Owned QA strategy across client engagements, centered on a configurable, multi-tenant P&C insurance platform serving carriers, Managing General Agents (MGAs), wholesalers, and retail agencies.
- Built a complete regression suite from scratch in 3 months as sole QA on a client engagement, creating the first reliable release gate for that product.

- Managed the defect lifecycle and release readiness in Azure DevOps; introduced a Root Cause Analysis (RCA) process that reduced recurring production defects.
- Applied risk-based testing across the full policy lifecycle: submission, quoting, binding, issuance, billing, and commissions.
- QA technical interview panelist; named Corporate Employee of the Quarter (Oct 2023) out of 1,300+ employees across the United States, Philippines, and India.

Tester Senior Analyst | Myridius
Aug 2022 – Jun 2023 · Hospitality / Hotel Loyalty (Hilton)

- Ran functional and regression testing for Hilton's loyalty platform, using Oracle SQL to reconcile UI bookings and points calculations against database records.
- Validated points accrual, reward redemption, and booking integrity across customer tiers; trained in Selenium, Cucumber, and JUnit.

Software QA Tester | Innovative Systems Group Global
Jan 2022 – Jul 2022 · Information Technology (IT) Service Management / Ticketing

- Sole QA for an IT ticketing integration; executed Unix shell scripts to validate automated incident ingestion between Zabbix (monitoring) and Znuny (helpdesk).
- Maintained full requirements traceability in TestRail and Jira; built initial Selenium WebDriver (Java) automation scripts.

User Acceptance Testing Analyst (QA Sub-Lead) | Innovative Systems Group Global
Apr 2020 – Dec 2021 · Healthcare Copay Systems

- Coordinated daily UAT for a team of 14 testers across 40+ sprints and monthly releases, ensuring full release coverage.
- Validated copay calculation and eligibility rules against patient and prescription parameters; UAT Standout Performer (Dec 2021) for execution and mentoring.

Functional Test Lead | Indra Philippines Inc.
Feb 2017 – Sep 2019 · Airline Payments & Booking

- Owned end-to-end payment testing for a major Southeast Asian airline across ~30 monthly releases: processing fees, card routing rules, and multi-currency transactions.
- Led and mentored a 3-person QA team (reviews, 1-on-1s, workload planning); ran monthly "Airline 101" knowledge sessions; YES Award (Jan 2018).

Tester Senior Analyst | Navitaire Inc. (an Amadeus company)
Feb 2011 – Feb 2017 · Airline Reservations & Revenue Management

- Executed functional, regression, smoke, and API-level booking validation for a mission-critical airline reservation platform.
- Promoted to configuration and validation owner on the Fare & Schedule team (fare rules, schedules, ancillary fees); Top 10 Bug Logger (2012), QAE Award (2013).

CERTIFICATIONS

- ISTQB Certified Tester – Testing with Generative AI (CT-GenAI) – May 2026
- ISTQB Certified Tester Foundation Level (CTFL) – Jun 2019

EDUCATION

- Master of Business Analytics (in progress, expected Dec 2027) – Mapúa University, Manila
- Bachelor of Science in Computer Science – Mapúa University, Manila
