

## JULIANA AMPARO CABRERA

Las Piñas, Metro Manila, Philippines | jaacabrera@gmail.com | 09178157727

### PROFESSIONAL SUMMARY

---

Senior QA professional with 15+ years of enterprise testing expertise in airline, insurance, and SaaS platforms. Specialized in risk-based testing, defect analytics, root cause analysis (RCA), and quality governance. Proven track record identifying critical defects, implementing risk mitigation strategies, and driving production stability through User Acceptance Testing (UAT), System Integration Testing (SIT), and regression planning. Expertise in cross-functional collaboration. ISTQB Certified Tester.

### CORE SKILLS & TECHNICAL EXPERTISE

---

**Testing Expertise:** Functional, regression, smoke, sanity, SIT, UAT, web, exploratory, usability

**Mobile QA:** Manual testing (iOS/Android), regression, exploratory, usability, device/OS compatibility

**Test Management Tools:** Azure DevOps, JIRA, Zephyr Scale, TestMo, TestRail

**Technical Knowledge:** Oracle SQL, Unix, HTML, CSS; Java; Selenium WebDriver, JUnit (*basic familiarity*)

**QA Leadership & Governance:** Test strategy & planning, risk-based testing, defect analytics, Root Cause Analysis (RCA), release validation, UAT governance, defect lifecycle management, Agile collaboration

**Domain Experience:** Airline reservation systems, insurance platforms, healthcare copay systems, IT ticketing, SaaS applications

**GenAI in QA:** ISTQB CT-GenAI certified; applied portfolio projects using Claude AI for code generation and OpenAI API for automated test case creation; prompt engineering for regression and exploratory test design; AI-assisted test automation integration

### PROFESSIONAL EXPERIENCE

---

**Senior QA Tester** | Deel Philippines EOR Services Inc. | Jul 2025 to Mar 2026

*Domain: SaaS / HR Technology (Startly Platform)*

- Developed and executed comprehensive test strategy for Startly platform, identifying risk areas and defining testing priorities aligned with business criticality
- Designed 900+ manual test cases applying risk-based testing techniques, focusing on high-impact workflows and potential failure points
- Authored behavior-driven (Gherkin) test scenarios to clarify requirements and increase test coverage across user journeys
- Performed end-to-end functional and regression testing across web and mobile platforms, ensuring production stability prior to releases

**Quality Engineering Manager** | Myridius (formerly RCG Global Services) | Jul 2023 to Jun 2025

*Domain: Insurance & Enterprise Applications*

- Developed risk-based test strategies for insurance and enterprise applications, identifying critical workflows and implementing targeted testing approaches
- Analyzed recurring production defects, conducted root cause analysis, and led quality improvement initiatives that reduced repeat incidents
- Managed defect lifecycle and release readiness through Azure DevOps, collaborating with Product Owners to prioritize issues and meet release readiness standards
- Supervised distributed QA team across Philippines and India, ensuring consistent application of testing methodologies and quality standards
- Served as sole QA tester for a client engagement, independently building the full regression test suite from scratch within 3 months
- Served as a panel evaluator in a QA candidate technical interview, assessing testing knowledge and domain fit to support the hiring decision
- Recognized as Corporate Employee of the Quarter (Oct 2023) for this contribution and overall quality impact

**Tester Senior Analyst** | Myridius (formerly RCG Global Services) | Aug 2022 to Jun 2023

*Domain: Hospitality / Hotel Loyalty (Hilton)*

- Validated complex loyalty points accrual and redemption workflows for Hilton's hotel booking points platform, utilizing Oracle SQL to verify points calculations and booking data integrity
- Executed functional and regression testing across hotel booking and loyalty modules, ensuring accurate points calculations across booking scenarios
- Completed internal Selenium, Cucumber, and JUnit training sessions, building foundational knowledge of test automation frameworks

## **User Acceptance Testing Analyst** | Innovative Systems Group Global | Jan 2022 to Jul 2022

### *Domain: IT Service Ticketing*

- Operated as sole QA tester for the IT ticketing project, independently owning full test coverage from requirements review through production validation
- Executed Unix scripts to validate automated ticket creation across Znuyn (helpdesk) and Zabbix (monitoring) systems, ensuring end-to-end integration reliability
- Managed test cases and defect tracking in TestRail and JIRA, maintaining structured traceability across both application domains
- Contributed to an internal automation initiative using Selenium, Cucumber, and JUnit to automate login and employee management flows for an ISGG web application

## **User Acceptance Testing Analyst** | Innovative Systems Group Global | Apr 2020 to Dec 2021

### *Domain: Healthcare Copay Systems*

- Served as sub-lead for the healthcare copay system project, performing functional testing while overseeing and coordinating QA activities across a team of 14 testers to ensure comprehensive test coverage
- Awarded UAT Standout Performer (Dec 2021) for providing guidance and mentorship to junior UAT analysts, ensuring quality delivery and strengthening team capability

## **Functional Test Lead** | Indra Philippines Inc. | Feb 2017 to Sep 2019

### *Domain: Airline / Aviation — Payment & Booking Systems*

- Owned payment testing on airline booking systems as primary QA resource, covering processing fees, card route restrictions, and multi-currency transactions
- Led a 3-person QA sub-team; conducted performance reviews and monthly 1-on-1s to support individual growth
- Facilitated monthly “Airline 101” brown bag sessions to build team domain knowledge on Navitaire configurations
- Created and maintained QA process documentation as a standardized reference for the team
- Served on the QA hiring panel to evaluate candidates’ technical knowledge and domain fit
- Executed release validation and post-deployment checks for mission-critical payment function
- Awarded YES Award (Jan 2018) for technical excellence and quality leadership

## **Tester Senior Analyst** | Navitaire Inc. (An Amadeus Company) | Feb 2011 to Feb 2017

### *Domain: Airline / Aviation — Booking & Revenue Management*

- Executed manual regression, smoke, and functional testing for airline booking applications, ensuring booking flow accuracy and production readiness across releases
- Validated end-to-end booking workflows covering seat selection, passenger details, reservation management, and confirmation processing
- Joined the Fare and Schedule team, assuming configuration and validation responsibilities including fare setup, schedule management, fees, and airline system settings
- Performed configuration testing for fares, schedules, ancillary fees, and airline-specific parameters, verifying correct application across booking scenarios
- Achieved Top 10 Bug Logger (2012) and QAE Award (2013) through excellence in defect identification and quality analysis

## **EDUCATION**

---

Master of Business Analytics (in progress, expected Dec 2027) - Mapúa University, Manila

Bachelor of Science in Computer Science - Mapúa University, Manila

## **CERTIFICATIONS**

---

ISTQB Certified Tester Foundation Level | Tricentis Tosca Data Integrity Product Consultant | Tricentis Tosca Product Consultant | ISTQB CT-GenAI
